Excellence in Heavy Form Carpentry
Heavy and highway construction work doesn’t have the luxury of a second chance. Whether it’s a bridge form, water treatment plant, or high-rise structure, productivity must be at its peak to counteract shrinking budgets and accelerated schedules.

Heavy Form Carpentry Solutions: Fast, Accurate, Solid

Central South heavy and highway carpenters are experts who put high value on effective training and customer service. We stress teamwork, communications, technical proficiency and safety. We train, test, monitor, and train some more. When our members go to a job site, their workload is full of tasks that they’ve trained for, worked at, and excel in. We:

- partner with project owners to solve problems and complete tasks to the customer’s satisfaction
- leverage new technologies, installation methods and materials to increase work value
- address challenges that surface during a project in a manner that keeps productivity humming

Our Skills Go Beyond Carpentry:
- **Expertise.** We solve problems quickly by troubleshooting the issue and implementing a solution.
- **Flexibility.** Disciplined crews are available to work non-traditional hours to keep projects on time.
- **Professionalism.** The most important tool we have is our mind. We understand the importance of a good attitude and professional work ethic, and how to properly represent the contractor and the project owner on the job site.

Trained for Productivity

Intensive training sets Central South heavy form professionals apart. Classroom and hands-on instruction hone in on technical proficiency as well as soft skills such as understanding operations worksheets, and daily work schedules.

We offer customized training if a project needs it, and we provide training onsite, if that’s what it takes.
Just a portion of our training includes:

**Concrete Formwork Curriculum:**
- Introduction to Formwork
- Form Hardware
- Wall Forms
- Gang Forms
- Slab and Deck Forms
- Pre-Cast Concrete
- Grout, and Epoxy
- Bridge Forms
- Footing Forms
- Piers, Pile Caps, Columns
- Tilt-Up Wall Forms
- Slip Forms
- Insulated Concrete Forms
- Stair Forms
- Building Layout
- Fasteners

**Pile Driver Classes:**
- Crane and Rig Identification
- Accessories
- Hammers
- Types of Piling
- False work
- Foundation Systems
- Types of Shoring
- Timber Construction
- Layout Instruments
- Rig Set-Up
- Installation of Piling
- Rigging Techniques

**General Skills Curriculum:**
- Aerial Lifts
- Blueprint Reading
- Ergonomic
- Welding and Cutting
- Scaffold Erection

**Special Attention to Safety**
Safety is our top priority on every project. We are trained in the most current safety practices in the industry. In conjunction with OSHA, every Central South professional form carpenter masters safety training skills before being cleared to work. Training includes:
- OSHA 10/30
- MSDS
- First Aid/CPR
- Fall Protection
- Ergonomics
- Asbestos Awareness
- Automated External Defibrillation

**Foremen and Superintendent Leadership**
We train the best candidates to be foremen and superintendents – leaders who motivate workers, communicate effectively and solve problems.
Make a Sound Business Decision

By placing Central South heavy form carpenter specialists on your project, you are avoiding the hassle and expense of recruiting, hiring, and training workers. Prevent scrambling to find these specialized carpenters with the proper qualifications that your job site calls for, and place the assignment in the hands of skilled, productive crews. By requiring Central South heavy form carpenters, you’ll quickly benefit from our commitment to keep you competitive and profitable.

Training craftspeople for over 120 years.
