Interior Systems Done Right. On Time.
New Construction: It’s About Time.
Attention to detail is an important aspect of our partnership with project management. From meeting schedules and solving mid-stream problems to doing accurate work that eliminates lengthy punch lists, our members focus on doing the job right, the first time.

Tenant Improvement: It’s About Customer Service
We protect furniture and flooring, adjust work schedules around office hours, and identify the best alternative restrooms, break areas, entrances and egresses to use so that your tenant’s clientele are not disrupted by our traffic.

Our Products Go Beyond Carpentry:
• **Experience.** We are versed in metal framing, firestop, layout, access floors, drywall applications and finishings, acoustical ceilings, framing, doors and hardware, solid surface, flooring, lathing, clean room construction, architectural finishing, and more.

• **Expertise.** We solve problems quickly by troubleshooting the issue and implementing a solution.

• **Flexibility.** Disciplined crews are available to work non-traditional hours to keep an occupied space in business during the typical work day.

• **Efficiency.** Working around tenant space is done as quickly and in the smallest work area possible, to ensure that tenant belongings are not affected by debris or material handling.

• **Professionalism.** We arrive at your job site with a professional appearance and act in an appropriate manner, especially around your tenants.
Special Attention to Safety
Safety is our top priority on every project. We are trained in the most current safety practices in the industry. In conjunction with OSHA, every Central South interior systems professional masters safety training skills before being cleared to work. Training includes:

- OSHA 10
- OSHA 30
- MSDS
- Mold Awareness
- Lead Awareness
- Confined Space
- First Aid/CPR
- Fall Protection
- Ergonomics
- Asbestos Awareness
- Automated External Defibrillation

Foremen and Superintendent Leadership
We train the best candidates to be foremen and superintendents – leaders who motivate workers, communicate effectively and solve problems.

Infection Control
The UBC has an exclusive training and certification program for work inside healthcare facilities. Our crews understand ICRA protocol, how to contain dust and pathogens during work, and how to protect patients, staff, and themselves from dangerous situations.

Trained for Productivity
Central South interior systems professionals are specifically trained to:

- partner with project owners to solve problems and complete tasks to the customer’s satisfaction
- leverage new technologies, installation methods and materials to increase work value
- address challenges that surface during a project in a manner that keeps productivity humming

We offer customized training if a project needs it, and we provide training onsite, if that’s what it takes. We pride ourselves in placing the most productive craftsman on your job site.
By placing Central South interior systems professionals on your project, you are avoiding the hassle and expense of recruiting, hiring, and training workers. Prevent scrambling to find interior systems professionals with the proper qualifications that your job site calls for, and place the assignment in the hands of skilled, productive crews. By requiring Central South interior systems professionals, you’ll quickly benefit from our commitment to keep you competitive and profitable.

**Superior Training.**
**Professional Craftsmen.**
**Productive Workforce.**

Training craftspeople for over 120 years.
